About IEHK

IEHK 2024 is designed to serve an outreach population of **10,000 people for 3 months**.

The Interagency Emergency Health Kit (IEHK) is designed by the World Health Organization (WHO) to meet the priority health needs of populations affected by emergencies. The kit is primarily intended for use in the early phase of an emergency and provides essential medicines and medical devices urgently needed for life-saving purposes.

The IEHK is requested by United Nations agencies, non-governmental organisations, and governments to ensure rapid and reliable access to quality-assured essential health supplies during natural disasters, such as floods, droughts, earthquakes, tsunamis, and human-made crises such as armed conflicts.

The IEHK is structured into two main modules: the basic module and the supplementary module.

The basic module contains products suitable for primary health care levels, including oral medicines and supplies for nurses and community health workers. The supplementary module is designed for hospital use and contains both oral and injectable medicines and supplies for physicians and specialised staff.

The IEHK is a cornerstone in the response to most humanitarian emergencies around the world and is the latest addition to Missionpharma's portfolio of emergency health kits.

48-hour dispatch

Missionpharma keeps stock of the IEHK 2024 and can dispatch the kit within 48 hours in case of an emergency or disaster.

Kit overview

The IEHK 2024 is organised into two main modules: basic and supplementary. Each module is further sub-divided into several standalone units. The illustration below displays the contents of:

- 1 basic module to serve 1,000 people for 3 months at primary healthcare level.
- 1 complete IEHK: 10 of each basic unit and 1 of each supplementary unit to serve 10,000 people for 3 months at hospital care level.

Procurement is flexible at unit level, allowing all basic and supplementary units to be requested in different quantities based on local needs.

About Missionpharma

Missionpharma is a global supplier of pharmaceuticals, medical devices, hospital equipment, and medical kits to public and private institutions, international development organisations, and UN entities.

We are driven by our purpose of improving global access to safe and affordable healthcare. Since 1975 we have delivered healthcare products that positively impact the lives of millions of people around the world.

With a dedicated team of 170 employees in five locations on three continents, we work closely with our trusted partners in the global healthcare industry to create long-term positive impact in the countries where we operate.

We maintain the highest standards of quality in our products and services to ensure the safety and well-being of patients.

In a constantly changing world, we possess the agility to work with both healthcare programmes and to offer emergency deliveries of medical supplies.

Together with our sister company, Fazzini, Missionpharma is a proud member of CFAO Healthcare – the healthcare division of CFAO Group owned by Toyota Tsusho Corporation. This partnership opens the way for a series of mutually beneficial business synergies and opportunities and provides us with direct access to a comprehensive distribution network in Africa.

Missionpharma keeps stock of the IEHK 2024 and can dispatch the kit within 48 hours in case of an emergency.

PURPOSE STATEMENT
We believe that access to safe and affordable healthcare is a human right. Since 1975 we have contributed to improving global health by supplying quality medicines and medical devices to people all over the world.
