

Delivery Kit

The absence of basic maternity supplies significantly increases the risk of infections to mother and child during childbirth.

Missionpharma has developed a range of quality assured and cost-effective delivery kits containing all basic supplies to ensure that childbirth is conducted in a clean and safe environment. The kits respond directly to the UN Millennium Development Goals 4 and 5 of reducing child mortality and improving maternal health.

Missionpharma contributes to progress in Africa by strengthening tomorrow's healthcare with intelligent solutions and trustful partnerships.
