

# Male Circumcision Kit

Male circumcision has proven to reduce men's risk of becoming infected with HIV through heterosexual intercourse by app. 60%.

Missionpharma has designed and developed a range of Male Circumcision kits, which contain all necessary devices to perform cost-effective male circumcision procedures and post-procedure care.

All kits are designed to meet international requirements to kit composition, quality and design. Missionpharma is one of the few prequalified suppliers to USAID funded projects.

Missionpharma contributes to progress in Africa by strengthening tomorrow's healthcare with intelligent solutions and trustful partnerships.
