

Medroxyprogesterone Kit

Medroxyprogesterone injection is a very effective method of birth control, which is injected once every 3 months by a professional healthcare provider.

Missionpharma has composed a kit, which contains all products to perform one IM Medroxyprogesterone injection. In addition to the Medroxyprogesterone vial and the auto-disable (AD) syringe, the kit also contains a pre-injection alcohol swab, a medical leaflet and an appointment card to effectively secure uninterrupted birth control.

Missionpharma contributes to progress in Africa by strengthening tomorrow's healthcare with intelligent solutions and trustful partnerships.
