Interagency Emergency Health Kit 2024

On a mission
for better health

www.missionpharma.com

About IEHK

The Interagency Emergency Health Kit (IEHK) is designed by the World Health Organization (WHO) to meet the priority health needs of populations affected by emergencies. The kit is primarily intended for use in the early phase of an emergency and provides essential medicines and medical devices urgently needed for life-saving purposes.

The IEHK is requested by United Nations agencies, non-governmental organisations, and governments to ensure rapid and reliable access to quality-assured essential health supplies during natural disasters, such as floods, droughts, earthquakes, tsunamis, and human-made crises such as armed conflicts.

IEHK 2024 is designed to serve an outreach population of **10,000 people for 3 months.**

The IEHK is structured into two main modules: the basic module and the supplementary module.

The basic module contains products suitable for primary health care levels, including oral medicines and supplies for nurses and community health workers. The supplementary module is designed for hospital use and contains both oral and injectable medicines and supplies for physicians and specialised staff.

The IEHK is a cornerstone in the response to most humanitarian emergencies around the world and is the latest addition to Missionpharma's portfolio of emergency health kits.

48-hour dispatch

Missionpharma keeps stock of the IEHK 2024 and can dispatch the kit within 48 hours in case of an emergency or disaster.

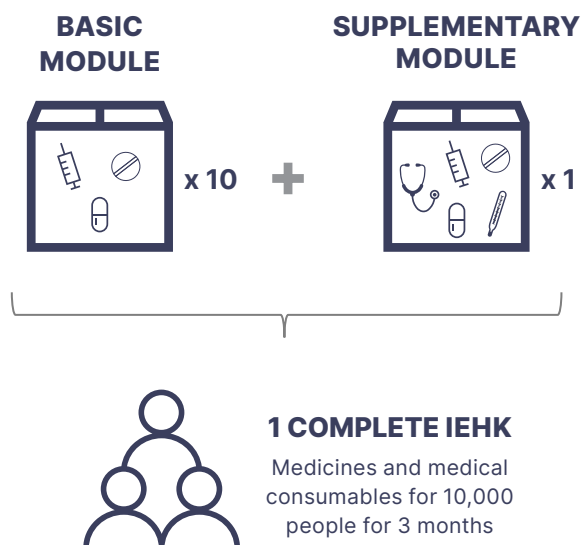

Kit overview

The IEHK 2024 is organised into two main modules: basic and supplementary. Each module is further sub-divided into several standalone units. The illustration below displays the contents of:

- 1 basic module to serve 1,000 people for 3 months at primary healthcare level.
- 1 complete IEHK: 10 of each basic unit and 1 of each supplementary unit to serve 10,000 people for 3 months at hospital care level.

Procurement is flexible at unit level, allowing all basic and supplementary units to be requested in different quantities based on local needs.

BASIC MODULE

	FOR 1,000 PEOPLE		FOR 10,000 PEOPLE
MEDICINE AND RENEWABLES UNIT		x 10	
MALARIA UNIT		x 10	
EQUIPMENT UNIT		x 10	

SUPPLEMENTARY MODULE

	FOR 10,000 PEOPLE
MEDICINE, ORAL UNIT	
MEDICINE, INJECTABLE UNIT	
MEDICINE, COLD CHAIN UNIT	
MALARIA UNIT	
MEDICINE, PEP UNIT	
RENEWABLES UNIT	
EQUIPMENT UNIT	
GLUCOMETER, PATIENT UNIT	
GLUCOMETER, HOSPITAL UNIT

About Missionpharma

Missionpharma is a global supplier of generic pharmaceuticals, medical devices, hospital equipment, and medical kits to public and private institutions, international development organizations, and UN entities.

We are driven by our purpose of improving global access to safe and affordable healthcare. Since 1975, we have delivered healthcare products and medical kits that positively impact the lives of millions of people around the world.

With a dedicated team of 160 employees in five locations on three continents, we work closely with our trusted partners in the global healthcare industry to create long-term positive impact in the countries where we operate.

To enhance our emergency preparedness, Missionpharma maintains a diverse range of emergency kits in stock, ready for rapid shipment. This ensures we can respond swiftly and effectively to any crisis situation worldwide.

Our warehousing and kitting facility, strategically located in the Kandla Special Economic Zone in western India, is ideally positioned for shipments to the African continent and Middle East region. This central location optimally connects manufacturers, customers, and end destinations, ensuring fast delivery.

Missionpharma keeps stock of the IEHK 2024 and can dispatch the kit within 48 hours in case of an emergency.

PURPOSE STATEMENT

We believe that access to safe and affordable healthcare is a human right. Since 1975 we have contributed to improving global health by supplying quality medicines and medical devices to people all over the world.
