

PED/SAM module overview

The PED/SAM kit is divided into eight modules, each carefully designed to address the complex medical needs of malnourished children. The kit can be purchased as a complete kit, or each module can be ordered individually. This flexibility allows modules to be supplied in preferred quantities, based on local needs.

MODULE	CONTENTS	DETAILS	NO. OF CARTONS
MODULE 1 KMEDPEDSAMMS-A1	MEDICINES SAM	Specialised treatments for children with Severe Acute Malnutrition with Medical Complications, based on WHO clinical guidelines.	
MODULE 2 KMEDPEDSAMMPOA1	MEDICINES PED ORAL	Essential medicines for common paediatric conditions, including antibiotics, antifungals, antiparasitics, and nutritional supplements.	
MODULE 3 KMEDPEDSAMMPIA1	MEDICINES PED INJECTABLES	Essential injectables and IV fluids for emergency and inpatient care, including antibiotics, antipyretics, and supportive treatments.	
MODULE 5 KMEDPEDSAMMMMA1	MEDICINES MALARIA	For the diagnosis and treatment of malaria, including ACTs, injectable artesunate, and rapid diagnostic tests.	
Module 6 KMEDPEDSAMMR-A1	RENEWABLES	Essential medical consumables and reusable tools for basic procedures and patient care.	
Module 7A KMEDPEDSAMMEA1	EQUIPMENT, PART A	Essential tools for diagnosis, monitoring, and basic clinical procedures, including scales, oximeter, haemoglobin analyser, and resuscitator.	
Module 7B KMEDPEDSAMMEBA1	EQUIPMENT, PART B	Disposable microcuvettes for use with the HemoCue Hb301 haemoglobin analyser.	
Module 8 KMEDMGLU300TLA1	GLUCOMETER	Glucometer kit with test strips and lancets for blood glucose monitoring	

Missionpharma does not supply Module 4, as it contains controlled medicines, which require special import permits.
